Grown on Robert Wayman Ranch in
the State of Washington

This is a sample of the Mammoth Iris Rhizomes grown at my farms in the fertile Yakima Valley in the State of Washington. The illustration is actual size.

These are the finest rhizomes in the world, and are being released this year for the first time.

These Washington-grown rhizomes have extra vigor and pep to withstand the coldest and most unfavorable climatic conditions.

North, South, East or West, you will get better results from Wayman's Yakima Valley grown stock, more flowers the first year, better plant growth, more increase.

And notwithstanding all this, the prices are lower.
